**AREA OF CONSIDERATION:
SCANG**

SPECIALTY SUMMARY:

Leads and performs intelligence activities across the full range of military operations supporting the Air Force's Service Core Function (SCF) of Global Integrated Intelligence, Surveillance and Reconnaissance (ISR), and specifically provides flying unit level support. Related DoD Occupational Group: 230100

DUTIES AND RESPONSIBILITIES:

- Directs intelligence activities. Directs ISR activities and organizations, and establishes goals and objectives. Reviews requirements for objectives and relative priorities. Serves as the commander's senior intelligence advisor. Directs preparation of intelligence budget estimates and financial plans. Implements standardization, evaluation, and training programs, and monitors compliance.
- Develops intelligence plans and policies. Evaluates impact of legislative action, executive orders, regulations, directives, and management decisions. Integrates intelligence activities into plans and programs. Develops and implements intelligence operations and applications policies, plans, concepts, systems, and orders for the intelligence disciplines, professional tradecraft, and integration with cross functional capabilities. Conducts force development, management and structure planning.
- Manages and coordinates intelligence activities. Confers with government, business, professional, scientific, and other nations' organizations to provide support, exchange ideas, participate in studies, and coordinate on proposals and findings. Manages intelligence responsibilities of the Department of Defense Planning, Programming, and Budgeting System. Coordinates with personnel, materiel, planning, programming, and operational functions on allocation of resources, availability of funds, and preparation and implementation of operational plans. Supports weapon system acquisition.
- Produces timely and accurate fused intelligence analysis. Uses structured analytical techniques to convert processed information into finished intelligence through the integration, evaluation, analysis, and interpretation of all-source data and the preparation of intelligence products in support of known or anticipated user requirements. Produces intelligence from the information gathered by the collection capabilities assigned or attached to the joint force and from the refinement and compilation of intelligence received from subordinate units and external organizations. Integrates, evaluates, analyzes, and interprets all processed information to create products that will satisfy the commander's priority intelligence requirements (PIRs) and requests for information (RFIs).
- Employs multi-domain sensing grid activities. Performs activities such as collection operations (sensing), analysis (identify and attribute), delivering information to customers, and collaborating with partners (sharing). Understands cloud technology, machine intelligence, and big data analytics combined with critical thinking skills to accelerate intelligence activities in a fast-paced, data-intensive environment where Airmen act as both producers and consumers of information. Understands how to operate within a collaborative sensing grid and use a common data environment to enable human-machine teaming and empower ISR Airmen to be more effective in solving problems and delivering time-dominant intelligence.
- Performs targeting functions. Performs targeting functions to include kinetic and non-kinetic target development, weaponeering, precision point mensuration (PPM), force application, execution planning, and combat assessment. Selects and prioritizes targets and matches appropriate actions to those targets to create specific desired effects that achieve objectives, taking account of operational requirements and capabilities. Conducts analysis of enemy personnel, units, disposition, facilities, systems, and nodes relative to the mission, objectives, and the capabilities at

the Joint Force Commander's disposal, to identify and nominate specific centers of gravity (COG) and high-value targets (HVT) that, if exploited in a systematic manner, will create the desired effects and support accomplishment of the commander's objectives.
